

A DRIVE TO ICT SOLUTIONS FOR AGROBIODIVERSITY COMMUNITIES & OPEN DATA WORLD

Innovative tailored made **data driven solutions** for farmers, small communities, networks and clusters

Collaboration within and between communities (small diversified farming, precision farming, food suppliers) and interactions with researchers (ICT and agro-biodiversity), hacker communities, civil society, and small businesses

Open data driven innovation in the agri-food through a comprehensive open data catalogue

Cloud based platform to support community based initiatives concerning biodiversity in agri-food systems and food quality

Concrete and bottom-up pilot and **ICT applications** for three different scenarios: **Seed, Field and Food**

Dive into the agrobiodiversity world through the CAPSELLA integrated approach

Avail of the **CAPSELLA website** and see what it is going on in the sparkling ICT world for farmers and communities. Find out what farmers needs and requirements are!

Join the awareness raising **networking events** such as the first workshop taking place in **Volterra, Pisa on 30th and 31st May 2016**

Give your contribution to the **farmers communities dialogue** on the use of open data and ICT in agriculture and food sectors

Voice your requirements by filling in the on-line questionnaire about innovative ICT tools to be developed

Participate to the three **pilots** on seeds, fields and food based on the developed ICT tools

... And finally stay tuned and participate to the **hackatons and bootcamps events** which will pave the way to the incubation activities and the creation of start ups!
