

Participatory development of a soil health monitoring platform with organic farmers communities

Diego Guidotti diego.guidotti@gmail.com

Institute of Life Sciences, Scuola Superiore Sant'Anna (Pisa)

1) START FROM REAL CHALLENGES OF STAKEHOLDERS

2) BE CLEAR ON WHAT DIGITAL TOOLS CAN AND WHAT CANNOT DO

How to make the interaction between ICT-stakeholders and agroecology-stakeholders work?

SPADE TEST

- Qualitative method
- Fast and free of charge
- No need of technical support
- Increases farmer awareness

You have an unfinished job! Resume the spade test.

Resume

For performing the test, you need only a digging spade or fork (with blade of at least 30 cm). In addition, you can use a knife with flexible blade to clean the sample surface and a white tray can be used as support to visualize better the sample.
